Mckinley and Wilson abroad.

In 1890 William McKinley was burned in effigy in the English manufacturing city of Sheffield; but in 1894 William L. Wilson was dined and wined in London because he is the author of a Free-trade Pariff Bill. These are significant facts.

THE Chicago Record remarks that the public debt is rapidly getting back to where it was at the commencement of the previous Administration. When General Harrison was inaugurated in 1889 the total interest-bearing debt of the United States was \$889,853,990. When he went out of office in 1893 it was only \$585,029,100. On February 1st, 1895, it had increased to \$684,323,710, and when the new \$100,000,000 loan now being negotiated is placed the total will be \$784,323,710.

A PROMINENT feature of an immigra tion and naturalization bill introduced in Congress by Representative LINTON is that which requires aliens expecting to emigrate to the United States to apply at emigrate to the United States to apply at least three months prior to embarkation to the United States Diplomatic or Con-sular representative resident nearest their places of residence for a certificate of immigration. The representative of this Government is to require proof that the applicants are not excluded by any law of the country from emigrating thereto before a certificate is issued.

MAKE TRAVEL FREE!

LET ALL THE PEOPLE HAVE **EQUAL BENEFITS!**

Our esteemed contemporary of The Georgetown Times doesn't understand the "connipus" of THE LEDGER'S re-marks about the delinquent tax list friend H. H. Cox, in noting a decline of values and hard times in Ohio, assigned as his reason for it that the people over there were so heavily taxed to keep ur free pikes. Oh, no, Brother Bell: there always will be delinquent taxpayers; some people would be delinquent if their only ecupation was digging diamonds from years end to years end

THE LEDGER wants every neighborhood to have good roads, and it wants to make the burden equal on all the people.

One way to accomplish this is to acquire the roads by purchase, place them in charge of a non-partisan Com-mission, and levy a small per cent. on the county assessment to maintain them.

But the most logical and the most quitable and as we believe the most eco equitable and as we believe the most economical way to accomplish the purpose is to ascertain from the owners the average yearly receipts of the gates within this county on all roads and to pay an equivation that the works were received from a fund county on all roads and to pay an illent to the toils now received from a fund to be provided by equal taxation for that
